# *Sultanas' Journey Story*

## *Our Story*

Erkanlar was established half century ago with the initiations of Mustafa and Hüseyin ERKAN brothers that they have started their business life with petrol station in Gölarmara Manisa.

Crowning its entrepreneurial spirit with cotton gin factory, Erkanlar has continued its development in the agricultural sector with olive production over the years.

Attaching importance to institutionalization and professionalism in process management, Erkanlar has continued new breakthroughs in

the sector by blending its respect for human and nature. As a result of the development, it has also had a strong production area in the Aegean Region with 2000 decares of cotton fields, 1000 decares of olive trees and 1000 decares of vineyards.

Erkanlar, which takes care of what they take from nature, has become to bring its productions to the world with the power given by its values and meticulous approach to work.

In this context, Erkanlar, which develops its agricultural processing factories according to

these products, continues its way with 10000 tons of cotton gin and 15000 tons of raisins processing facilities.

Our raisins processing factory performs the process management in the most accurate way with its trained and well-equipped management staff and business employees with expert processing knowledge, equipped with high technology standards.

Attaching importance to world standards and food control, Erkanlar has documented its

system and reliability with HACCP, BRC, IFS and ISO 14001 documents.

Today, Erkanlar serves in a closed area of 15,000 square meters and an open area of 30,000 square meters in total, has taken its place in the sector with 15,000 tons of raisins production per year.

Keeping up-to-date with the experience gained in half a century and the technologies of the developing world, Erkanlar continues on its way with the excitement of the first day.

## *Taste's Transformation Story*

Here's the story of the transformation that starts from the vineyards and reaches your tables. Each grape is grown with care. Under the leadership of Erkanlar Üzüm, farmers give their hands to the raisins with experience and education. There is labor. There is caring. Then Erkanlar's culture welcomes every single grapes. It is kneaded in the hands of a wise team. Every stage is supported by technology. Hygiene is indispensable. Meticulousness is in the soul of Erkanlar. And the combination of excitement and knowledge at each processing stage brings flavor to your table.

## *Production*

All process stages from product acceptance to shipment are followed meticulously.

After checking the conformity with the specification values at the goods acceptance, the products are typed and the input information is completed.

Raw material is prepared according to sultanas type. Sultanas are pouring by bin dumper and production starts.

When raisins are moving on the conveyor belt, lump breaker machine works and separates lumps. Then it is subjected to calibration.

Raisins are passing through 4 aspirators, they are cleaned from stalks and capstems. Then they are separated above and under sieves.

## *Production*

Then raisins are passing through cascade unity, they are cleaned with water. Capstem breaker machine separates capstems from raisins and they are passing through 6 aspirators.)

After aspirators 4 different laser machines scan raisins to avoid foreign materials such as stone, stalk, capstem, plastic, glass. Then x-ray machine also scans raisins and rejects unwanted foreign materials like stone, glass, ceramic.

After cleaning products are passing through inline metal detector. They are automatically measured. Then check weigher machine controls them. Proper products go to carton closing section and they are passing through final metal detector. And finally they are palletized. From here we take them to warehouse and keep them until loading date comes.
